

Albio 225 Thermal Break Sliding System

Albio 225 offers high insulation performance thanks to the thermal-breaking system, even on intense weather conditions. The sash and frame profiles come with 24mm polyamide bars. With 38mm sash width, the system offers excellent thermal insulation. A special feature of the system is the option of embedding a stainless steel rail into the frame profile for great functionality and durability. Its design includes two different patterns, flat and oval.

Technical Data

1	Aluminium alloy	AlMgSi 0,5 F22, DIN 1725
2	Powder coating	according to the QUALICOAT quality sign
3	Anodising	according to the QUALANOD quality sign
4	Dimensional tolerances	ENOT EN 12020-2
5	Gaskets	EPDM
6	Sash dimensions	width 38mm, height 97mm
7	Glazing thickness	5 to 22mm
8	Rollers	30mm adjustable,teflon rollers
9	Rail Profile	stainless steel, polyamide
10	Thermal-break	24mm (PA 6.6, 25% GF)

Applications: Windows, balcony doors, successive or built-in, etc.
